

CLAIMS

0016. What I claim as my invention is: (1) The electro-charger which incorporates the use of an electric powered motor directly operating a centrifugal air compressor or indirectly operating it through gears, pulleys, or wheels, for the sole purpose of increasing the horsepower output of an internal combustion gasoline engine. (2) The invention encompasses the use of an electric motor regardless of size, rotational speed, and power rating with any centrifugal type air compressor regardless of size or output rating.
